Room completed (100%)

- Reconstructing attacks during incident response
- Verifying and validating alerts

Below are two more scenarios that illustrate the importance of network traffic analysis:

- Based on the logs for an end-user system, the system began to deviate from its normal behavior around 4 PM UTC. Analyzing the network traffic going to and from this system, we found a suspicious HTTP request and were able to extract a suspicious ZIP-file
- We received an alert that an end-user system is sending many DNS requests in comparison to baseline of the network. After inspecting the DNS requests, we discovered that data was exfiltrated using a technique called DNS tunneling

Now that we know **why** we need network traffic analysis, let's continue with the next task to discover **what** exactly we can monitor.

Answer the questions below

What is the name of the technique used to smuggle C2 commands via DNS?

DNS tunneling ✓ Correct Answer

Task 3 What Network Traffic Can We Observe?

Network Traffic Sources and Flows

How Can We Observe Network Traffic?

Time	Source IP	Destination IP	Protocol	Source Port	Destination Port	Info
2	0.0.0.0:25	192.168.1.10	192.168.1.1	ARP	80	192.168.1.10 is at 00:11:22:33:44:55
3	1.0.0.2010	192.168.1.200	192.168.1.1	ARP	60	192.168.1.10 is at aa:bb:cc:dd:ee:ff <-- Attacker spoof
4	1.0.0.2015	192.168.1.200	192.168.1.10	ARP	60	192.168.1.1 is at aa:bb:cc:dd:ee:ff <-- Attacker spoof
5	1.100000	192.168.1.10	172.217.22.14	TCP	74	54433 → 80 [SYN] Seq=0 Win=64240 Len=0
6	1.100120	192.168.1.200	172.217.22.14	TCP	74	54433 → 80 [SYN] Seq=0 Win=64240 Len=0 <-- Relayed via attacker

Answer the questions below

Look at the HTTP example in the task and answer the following question: What is the size of the ZIP attachment included in the HTTP response? Note down the answer in bytes.

10485760 ✓ Correct Answer

Which attack do attackers use to try to evade an IDS?

fragmentation ✓ Correct Answer

What field in the TCP header can we use to detect session hijacking?

sequence number ✓ Correct Answer

KDC SERVER - DOMAIN CONTROLLER

Answer the questions below

Which category of devices generates the most traffic in a network?

endpoint

✓ Correct Answer

Before an SMB session can be established, which service needs to be contacted first for authentication?

kerberos

✓ Correct Answer

What does TLS stand for?

Transport Layer Security

✓ Correct Answer

Task 5 ✓ How Can We Observe Network Traffic?

Task 6 ✓ Conclusion

To implement NetFlow or IPFIX, we don't need a whole new set of infrastructure or dedicated servers. Most vendors implement these protocols standard in their devices. We just have to enable and configure the protocol and have a place to send the metadata. You don't need a dedicated server for collecting this data; many NGFWs, IPS, and IDS have an implementation to collect and analyze flow data.

Answer the questions below

What is the flag found in the HTTP traffic in scenario 1? The flag has the format THM{}.

THM{FoundTheMalware}

✓ Correct Answer Hint

What is the flag found in the DNS traffic in scenario 2? The flag has the format THM{}.

THM{C2CommandFound}

✓ Correct Answer Hint

Task 6 Conclusion

How likely are you to recommend this room to others?

1 2 3 4 5 6 7 8 9 10

Task 5 How Can We Observe Network Traffic?

Task 6 Conclusion

Now that we know what NTA is, why we need it, how to capture network traffic and analyze it; we are ready to get hands on with effectively analyzing network traffic using a tool called Wireshark. Proceed to the next room to get started with the basics of Wireshark.

Answer the questions below

I am ready to do some traffic analysis!

No answer needed

✓ Correct Answer

Thank you! 🎉

The image shows a screenshot of a web browser window on the tryhackme.com platform. The user has completed the 'Network Traffic Basics' room. A large green circle highlights the central message 'You did it! 🎉 Network Traffic Basics complete!'. Below this, there are five summary cards: 'Points earned' (72), 'Completed tasks' (6), 'Room type' (Walkthrough), 'Difficulty' (Easy), and 'Streak' (1). At the bottom, there are two buttons: 'Leave Feedback' and a green 'Continue' button. The browser interface includes a tab bar with 'Traffic Analysis Basics' and 'New Tab', and a status bar with a lock icon and the URL.
